

UPPERVILLE SHOW
DRAWS D. C. FOLK

David Gray, Owned by Mr. and Mrs. Hitt, of This City, Wins Feature Class.

Upperville, Va., June 17.—Despite the heavy rain, the opening day of the annual Upperville Horse Show was marked by unusually good performances, a large contingent of horse lovers from Washington, Baltimore and many parts of the Old Dominion being present to witness the sport.

The feature of the jumping classes was the performance of the veteran hunter, David Gray, owned by Mr. and Mrs. William F. Hitt, of Washington and Middleburg, Va. The animal, now past his seventeenth milestone, won the feature class of the afternoon, the open-to-all jumpers event, adding another blue to the hundreds of ribbons he has won since Julian Morris began showing him years ago.

John R. Buchanan, son of Gen. James A. Buchanan, U. S. A., retired, of Washington and Upperville, Va., won a blue in the class for yearlings suitable to make hunters and a red in the class for 3-year-olds suitable to make hunters. Frederick McElhiney was another entrant well known to Washington horsemen who won Riding Silver Crest. Mr. McElhiney beat out David Gray, of the Hitt stables, and a dozen other high caliber horses in the class for half-bred jumpers. The Hitt entry was placed second and Mitchell Harrison's Eagle Plume was awarded the yellow.

In the boxes and stands were Mr. and Mrs. John R. Buchanan, Misses Katherine and Edith Lester, Miss Grace Overman, Miss Josephine Norris, Mrs. H. T. Conrad, Miss Eugenia Pichon, Miss Ethel Hartman, Mr. and Mrs. William F. Hitt, Mr. and Mrs. Brooke Baker, Mr. and Mrs. R. Hunter Dulany, Mr. and Mrs. Frederick McElhiney, Dr. and Mrs. Archie Randolph, Reginald Hutchinson, of Philadelphia and Pitman Springs; Win Lockwood, Porter Guest, Samuel Meek and John Hemphill, of Washington.

William C. Eustis, of Washington; Frances Peabody, of Boston; Charles Mather, of Baltimore, and A. C. Swart, of New York, were the judges.

The show will be concluded tomorrow, when a card of sixteen harness and jumping events will be shown.

OFFERS FORTUNE TO SERVANTS.

Illinois Man Willing to Pay High for Good Domestic.

Chicago, June 17.—An unusual situation created by the death in domestic came to light today when the Illinois Free Employment Office announced that a man worth \$70,000, who is adding \$1,000 a year to his belongings, is willing to give his fortune at the death of himself and wife to two girls—one a domestic and another a clerk—if he can find them.

Anti-Cruelty Lecture Starts Hot Debate at Pythian Temple.

The old-fashioned "tempest in a teapot" found its present-day prototype in the Pythian Temple last night when eighteen men and women met under the auspices of the Anti-Cruelty League to listen to a lecture by M. J. Witting, of the Anti-Vivisection Society, of New York.

Mr. Witting had three complaints to make—that animals used for vivisectionists and medical experiments are cruelly treated; second, that serums are used experimentally on human beings before the makers of the serums know their value, and that serums usually are no good anyhow, and more apt to kill than cure.

Then the floor was turned over to general argument, two young bacteriologists from a local laboratory given over to the making of serums and vaccines, took exception to the lecturer's remarks. In every instance, they declared, he was either "entirely mistaken" or "misinformed." Nothing he said was correct, they stated.

Enthusiastic anti-vivisectionists defended the lecturer. People are being killed every day, they declared, as a result of the use of serums and vaccines. They challenged the bacteriologists to show an instance where humanity had been benefited by experimentation on animals. The bacteriologist declared the challenge unworthy of reply, and invited the challengers to go home and read up on medical history.

Next came charges and denials as to the cruel treatment of animals, used for such purposes. The anti-vivisectionists declared that the animals were strapped into apparatus and kept over to the vivisectionists ruthlessly cut them with weird-shaped knives, that they were confined in pens so small that it was impossible for them to get sufficient exercise, and that they were treated so cruelly that death must necessarily be a cause for animal delight.

These charges were denied. The bacteriologists declared they saw those animals every day, watched them experiment on, and experimented on them sometimes. The animals were treated with great kindness and gentleness, they said. They averred that the animals lived very happy lives.

They went farther and said they even died happy deaths, for, they said, they were invariably chloroformed.

These claims aroused a man in the back of the hall, who demanded to know if dropping a dog fifty feet on a sheet of iron to break its back, should rightly be called "kind and gentle treatment."

His own opinion was that such a happening would be anything but pleasant. He also averred that instead of treating a dog that way, it would be better to drop "some people he knew of" instead.

Dogs were worth more than lots of people, he said.

One of the bacteriologists wanted to know if this man had a personal experience dropping fifty feet. He said he had not, whereupon the bacteriologist shook his head sadly, and murmured "Too bad."

Tomorrow the lecturer will appear with various other anti-vivisectionists before Congress to urge the passage of a bill appropriating \$20,000 to be expended in a Federal investigation of the methods employed in every animal laboratory in the country.

Fifteen Shot in Strike Riot.

Oakland, Cal., June 17.—One man was shot dead and fifteen others were wounded as the result of a pitched battle between fifty employees of the Sunset Lumber Company and 100 strike sympathizers.

Progressives Will Swing to
Hughes, Says Moose Worker

Representative Stephens, of California, After Conference With Nominee, Predicts Roosevelt Backers Will Unite With Republicans.

Representative W. D. Stephens, Progressive, of California, yesterday afternoon, after a long conference with Charles Evans Hughes, announced that "the Progressives will swing to Hughes."

The announcement was taken here to mean that the Hughes conference with the Progressive leaders yesterday afternoon has resulted in some plan by which the two parties are to be reunited, believed to have been suggested by Gen. Leonard Wood, personal friend of Col. Roosevelt.

"The Progressives will vote for Hughes. That is all I care to say," Representative Stephens stated as he left the Hughes residence.

Mr. Hughes, who came home for a breathing spell, was far from accomplishing that purpose yesterday. A steady stream of callers—Senators, Representatives and persons in politics and out—made their way up to the red brick house on Sixteenth street to extend their

congratulations, to give political advice and to suggest speech-making trips.

All of these the Republican candidate received affably, but the net result of the day's conferences was no decision whatever on the momentous questions which are before him for answer. To those he received he indicated clearly that he expects to arrive at no conclusion concerning the political course to be followed between now and next November until he has consulted Republican leaders upon his return to New York tonight.

The one conclusion to be drawn from Mr. Hughes' activities so far is that if he decides to run his own campaign, he is not going to do it without consulting the political leaders who are supporting him. He apparently purpose to take each step deliberately and shows no sign whatever of any intention to "go it alone," as some of the Republican leaders had feared.

On April 21, 1914, Surgeon Cohanah found McLean guilty of mismanaging several estates, among these being the estate of the late Henry Huber. Mrs. Huber testified that she had placed \$20,000 in McLean's hands, and that he had accounted for only \$5,000. Mrs. Charlotte L. O'Connor, daughter of the late Mrs. Amelia E. Follock, complained under oath that McLean, who was managing the Huber estate, had ceased to pay her any of the income to which she was entitled under the will. When these hearings were on in the Surrogate's Court accused of mismanagement, were made against McLean by Mrs. Mary A. Surfer and the trustees of the Third Reformed Presbyterian Church.

When these hearings were on in the Surrogate's Court accused of mismanagement, were made against McLean by Mrs. Mary A. Surfer and the trustees of the Third Reformed Presbyterian Church.

The statement of Dr. Irving Fisher that a baby is worth a nation at a time when gayety is at a premium. Paragrapher and cartoonist have made the most of it, and there isn't a wait-moment in the land who hasn't taken his trusty third string in hand, and trumped out a single, while the man next door who wouldn't take a million dollars for his baby, or give a cent for yours, has joined in the general laughter. Blessings on thee, Fisher man, for the scientist who can make grim facts a cause of glee is the scientist for me.

It isn't so funny when he says a man is only worth \$4,000. There are women who would give their figures for a fairly good baby ought to be at least \$4,000 worth of possibilities, while many men would be dear at half the price. Still that sum as a regular market quotation on men shows a harsh tendency to undervalue the human which are not too tenderly sentimental, rate a perfectly good man, in reasonable repair, as worth \$5,000, and have been known to pay that much for him after he was dead.

This ridiculously low figure must be a result of the European war that has made "flesh and blood so cheap" that it seems only fit to be rated along with gun cotton and other munitions.

After reading this book a prominent economist said: "Now that's what the government is for; I don't pretend to understand the tariff, or financial systems, or why my husband thinks we must vote this ticket, while my father is sure the country will go to perdition if we don't vote the other. It doesn't even interest me much, but I do understand the necessity for pure air and food and a sanitary water supply. And I think I understand about babies—one dies every ten seconds, six have died during the minute I've been talking. But no, I'm all wrong. I don't understand, none of us understand! If we did we wouldn't just talk; we'd do something about it!"

Which is probably quite true, for even at the very reasonable rate of \$90 per baby this country can hardly afford to sacrifice \$27,000,000 worth of babies annually, and needlessly. Dr. Fisher shows that at least 41 per cent of these deaths could be prevented, and probably if we put our minds to it we might make much greater percent. One out of every six babies born in the United States dies before it is a year old. In New Zealand only one out of a hundred and forty succumb. Of course, the comparison is hardly fair, for New Zealand has an equable and fairly uniform climate, and not a great diversity of races, but making all possible allowances the disparity is still too great.

Any scheme of "babyhood" that does not have a correlative somewhere in the background for taking care of the nation's children is a poor scheme, for it does not work both ways. With more terrible means of dealing with death today, our country greater regard for life at its beginnings or we shall inevitably lose that poise and balance of the soul without which no people can be truly great.

(The first British settlement of Australia was in 1788, when eleven ships containing 750 convicts, sailed into Botany Bay and unloaded.)

TRUSTEES PLAN
LAW BUILDING

George Washington Officials Start Campaign to Raise Fund of \$100,000.

A campaign to raise \$100,000 for the purchase of a site and the erection of a law school building for the George Washington University has been launched by the board of trustees.

The entire sum will be raised by voluntary subscription on the part of students, alumni, faculty members, trustees, business men, and others interested in the welfare of the university.

Although the crusade will not be vigorously pushed until the fall, activities will be conducted throughout the summer. Pledge cards already have been printed and will be distributed broadcast.

Subscriptions are being received by Charles W. Holmes, treasurer of the university, 204 G street northwest. The distribution of the pledge cards is under general direction of Prof. Everett Fraser, dean of the Law School. The erection of a Law School building has been necessitated by the phenomenal growth of the school in registration and in prestige.

Expect Sum in Two Years. It is expected that the entire sum of \$100,000 will be raised within two years. As soon as a sufficient amount has been raised to purchase the site, the lot will be bought and plans will be prepared.

Although the campaign has just been launched, numerous subscriptions already have been received. At present the Law School has a surplus fund of \$15,000, and should it be found necessary this amount can be applied to the building fund.

For several months the board of trustees had been considering the problem of erecting a Law School building and a new science hall, but it was thought advisable to give heed first to the need of new Law School quarters.

Air sirens for short distance signalling have been invented by a Frenchman and mounted on the masts of ships, have been heard as far away as two miles.

LOVE FOR WIFE
CAUSES ARREST

Donald McLean Attends Funeral of D. A. R. Leader and Falls Into Police Net.

New York, June 17.—The love which led him to attend the funeral of his wife in Baltimore resulted in the arrest today of Donald McLean, prominent attorney and society man of this city, in Frederick, Md. It was learned here today, on a charge of grand larceny, McLean is resisting extradition, and will be given a hearing before Judge Eckstein in Frederick next Thursday.

McLean's wife, daughter of the late Judge John Ritchie, and for a number of years past president general of the Daughters of the American Revolution, died in an infirmary in Baltimore last month. Her husband, for whom detectives had been searching vainly for nearly two years, attended the funeral. As a result detectives picked up the trail, followed, and finally arrested him.

The accused attorney was indicted by a grand jury on June 1, on complaint of the board of trustees of the Third Reformed Presbyterian Church, No. 238 West Second street. He is charged with the indictment with the theft of \$5,000, which had been entrusted to him for investment by the trustees some ten years ago. In 1913 he was asked to make an accounting and in court in November of that year it was announced that he had turned out of the city because of illness. His whereabouts were unknown to any except members of his family, and it was only recently that a detective traced him to Frederick, Md., where his arrest followed.

On April 21, 1914, Surgeon Cohanah found McLean guilty of mismanaging several estates, among these being the estate of the late Henry Huber. Mrs. Huber testified that she had placed \$20,000 in McLean's hands, and that he had accounted for only \$5,000. Mrs. Charlotte L. O'Connor, daughter of the late Mrs. Amelia E. Follock, complained under oath that McLean, who was managing the Huber estate, had ceased to pay her any of the income to which she was entitled under the will. When these hearings were on in the Surrogate's Court accused of mismanagement, were made against McLean by Mrs. Mary A. Surfer and the trustees of the Third Reformed Presbyterian Church.

The Worth of a Baby.

By ELLIS MEREDITH.

The statement of Dr. Irving Fisher that a baby is worth a nation at a time when gayety is at a premium. Paragrapher and cartoonist have made the most of it, and there isn't a wait-moment in the land who hasn't taken his trusty third string in hand, and trumped out a single, while the man next door who wouldn't take a million dollars for his baby, or give a cent for yours, has joined in the general laughter.
